the term neuromechanics defines an integrative approach that combines the neuromuscular control and the biomechanical aspects of physical behavior in humans and animals crucial to this approach is a detailed description and modeling of the interaction between the nervous system and the controlled biomechanical plant only then do we have the broader context within which to understand evolution movement mechanics neural control energetics disability and rehabilitation in addition to enabling new basic science directions understanding the interrelations between movement neural and mechanical function should also be leveraged for the development of personalized wearable technologies to augment or restore the motor capabilities of healthy or impaired individuals similarly this understanding will empower us to revisit current approaches to the design and control of

robotic and humanoid systems to produce truly versatile human like physical behavior and adaptation in real world environments this research topic is therefore poised at an opportune moment to promote understanding of apparently disparate topics into a coherent focus

dr kaye and dr dhor have assembled top experts to write about facility planning and management in part i of their two issues devoted to infection prevention and control in healthcare articles in this issue are devoted to building a successful infection control program key components processes and economics hand hygiene sterilization high level disinfection and environmental cleaning environment of care infection control in alternative healthcare settings long term care and ambulatory antibiotic stewardship outbreak investigationswater safety in healthcare legionella in the healthcare setting construction and renovation bloodborne and body fluid exposures prevention and management of occupational health issues and informatics and statistics in infection control part ii is devoted to clinical management of infections
